

## CIRCULAR ECONOMY TOOLKIT

### Calibration Programme

The aim of the [C-VoUCHER project](#) is to boost the Circular Economy in Europe. From October 2018 until the moment, the C-Voucher Consortia composed of 13 organizations from 6 European countries, have successfully supported 54 circularity projects including both Circular Solutions and Business Cases from sectors such as Manufacturing, Healthcare, Agro-food, Textile and Blue Growth. Now, we would like to keep spreading the knowledge and sharing our best practices with you.

For this purpose, we have created a [Calibration Programme](#) in which we would like to offer you an overview of the strategies and tools available for customizing a Circularity Programme to your particular needs and ecosystems. The Calibration Programme will conduct 7 online sessions between March and April. You can find the links and dates in the attached infographic. Sessions are free and open to everyone interested in creating its own programme using or adapting the templates and strategies included in the [C-VoUCHER's Circular Design Toolkit for Regions](#).

But, on top of these sessions, we have decided to move things forward by creating an online Community of Practice, [Adapting our Circular Design Toolkit](#) Space within C-VoUCHER Community. In this online forum, concepts, processes and templates will be shared.

This is a private space which means that you need to receive an invitation to it.

Please follow the steps below to request to be invited:

1. Join the [C-VoUCHER Community](#) within the FundingBox platform: <https://c-voucher.fundingbox.com/>
2. Create a new profile and then [Sign in](#) with your existing login details
3. Send us an e-mail to [c-voucher.helpdesk@fundingbox.com](mailto:c-voucher.helpdesk@fundingbox.com) with your request to be added to the private space named [Adapting our Circular Design Toolkit](#)
4. You will receive an email confirming that your request has been processed.

We look forward to seeing you in the Calibration Programme and the Community!

Best regards,

C-VoUCHER team
